About Blue Dot Changes to the
List of Services That Require Authorization
For Blue Cross Medicare Plus Blue℠ PPO

Blue Dot changes
As part of the commitment by Blue Cross Medicare Plus Blue PPO to offer providers the most up-to-date information in a timely way, the list of Services That Require Authorization is revised on an as-needed basis using the Blue Dot change process.

Here’s how the process works:

- Changes are made as needed. Changes made since the previous publication are marked with a Blue Dot. This makes the most recent changes easy to identify.

- Each change is explained in the list of Blue Dot changes that appears on the final page of the document.

- A revision date is added at the lower right corner of the document.

- The first time that a revised list of Services That Require Authorization is published in a calendar year, the Blue Dots for the previous year are removed. The changes made in the new year become part of the baseline of the document for that year.

Accessing the list of Services That Require Authorization
To access the list of Services That Require Authorization, visit ereferrals.bcbsm.com and click Blue Cross. Then click Authorization Requirements & Criteria on the left navigation bar.
