Primary care physicians are not responsible for arranging, referring or authorizing behavioral health services. Primary care physicians may, however, directly refer a member to a BCN-affiliated behavioral health provider. It is not necessary for the primary care physician to provide a written referral to the behavioral health provider. The behavioral health provider must contact the plan for an authorization. Primary care physicians may call BCN Behavioral Health for assistance in arranging behavioral health services for a BCN member.

Members in need of behavioral health services may either contact an affiliated behavioral health provider directly or call the telephone number located on the back of their member identification card.
