Sinusotomy, Frontal, Endoscopic

We provide coverage for this procedure for adult members who meet medical necessity criteria. Submit authorization requests through the e-referral system.

The submitter will receive a prompt to complete a questionnaire to determine the appropriateness of the requested service. The questions are listed below.

If all questions are answered, e-referral will either approve or pend the case. If the case pends and we cannot authorize it, we will contact the provider for additional clinical information. Authorization is not a guarantee of payment.

Payment is based on established claim edits. We will retrospectively monitor compliance with this authorization requirement.

*CPT codes, descriptions and two-digit numeric modifiers only are copyright 2018 American Medical Association. All rights reserved.

See below for the questions you’ll encounter in the e-referral system.

Q Is the procedure requested CPT 31276 AND the patient has rhinosinusitis identified by CT findings of ONE of the following (A-C)? A. Air fluid levels. B. Opacification. C. Mucosal thickening greater than 2mm.

A Possible answers: □ Yes □ No □ N/A

Q Does the patient have complications or complicating factors, identified by ONE or more of the following (A-I)? A. Impaired immune system. B. Focal neurologic finding (for example, limitations with moving both eyes at the same time, visual disturbances, light sensitivity, seizures). C. Facial cellulitis. D. Orbital cellulitis or abscess identified by physical examination or CT. E. Periorbital abscess identified by physical examination. F. Meningitis identified by lumbar puncture. G. Intracranial abscess identified by CT or MRI. H. Cavernous sinus thrombosis identified by CT or MRI. I. Osteomyelitis identified by CT or MRI.

A Possible answers: □ Yes □ No □ N/A
Preview questionnaire: Sinusotomy, Frontal, Endoscopic
For Medicare Plus Blue℠ PPO, BCN HMO℠ (commercial) and BCN Advantage℠ members
