Welcome to the BCN Provider Resource Guide!

In this guide you will find contact information for many of the services that BCN offers and for the functions you most frequently perform in caring for BCN members.

Use the navigation bar at the left to go directly to the information for specific topics. Use the Next and Previous buttons at the lower right to navigate forward or backward in the document.

The pages in this guide are updated on an as-needed basis. The date shown in the lower left corner of the text reflects the date on which the information on that page was last revised. If you print any pages from the guide, be sure to check back for updates.

You can search the guide for a specific topic by inserting one or more keywords into the Find field immediately above the guide and pressing Enter.

If there is other information you feel should be added to the guide, be sure to let us know by contacting us at BCNProvComm@bcbsm.com.
Primary care physicians are not responsible for arranging, referring or authorizing behavioral health services. Primary care physicians may, however, directly refer a member to a BCN-affiliated behavioral health provider. It is not necessary for the primary care physician to provide a written referral to the behavioral health provider. The behavioral health provider must contact the plan for an authorization. Primary care physicians may call BCN Behavioral Health for assistance in arranging behavioral health services for a BCN member.

Members in need of behavioral health services may either contact an affiliated behavioral health provider directly or call the telephone number located on the back of their member identification card.
